IDENTIFIERS Recent College Graduates Survey 1978 (NCES)

ABSTRACT

This report provides data on occupational outcomes (type of occupation, unemployed, and not in the labor force) as of February, 1978, by major field of study for persons who received bachelor's degrees during the July 1, 1976-June 30, 1977, school year. Section 1 presents findings that summarize the occupational outcome data by major field of study. Since certain fields and occupations tend to attract members of one sex more than the other, occupational outcome is examined separately for males and females. Also, since the occupational outcomes of bachelor's recipients who are enrolled and who are not enrolled for an advanced degree may be different, occupational outcome is looked at separately for those enrolled and not enrolled for an advanced degree. The basic data tables presented in section 2 are designed to serve as reference tables for college students and others involved in the process of choosing a major field career. These tables provide profiles of occupation and employment status for the major fields of study covering all bachelor's recipients, men and women, and those enrolled and not enrolled for an advanced degree. Lance Ferderer, Editor

Foreword

This report is based on data from the National Center for Education Statistics' 1978 Recent College Graduates Survey. Statistical data are presented on the types of jobs obtained by individuals who received bachelor's degrees during the period July 1, 1976 - June 30, 1977 by major field. Data on graduates unemployed and not in the labor force are also presented. Some of the statistics may be distributed differently for males and females and for those who do and do not acquire further education. Therefore, the data are also presented separately for men and women graduates and graduates who are enrolled and not enrolled for an additional degree.

Acknowledgements

Occupations of Recent College Graduates was prepared in the Population Surveys Branch of the Division of Elementary and Secondary Education Statistics by A. Stafford Metz and John P. Sietsema.

J. Michael Brick of the Division of Elementary and Secondary Education Statistics prepared the technical appendix.

Samuel F. Barbett, of the Data Systems Branch, Division of Statistical Services, was responsible for data processing and computerized production of statistical tables.

Leslie J. Silverman, Lawrence E. Suter, and Charles H. Hammer of NCES and James J. Noell, of the Office of the Assistant Secretary for Planning and Budget in the Department of Education, reviewed early drafts and made valuable contributions to the structure and organization of the report.

For More Information

This is one of several reports based on the 1978 Recent College Graduates Survey. Another is New Teachers in the Job Market, copies of which are available for \$2.25 from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (S/N 065-000-00078-4). A report on the labor force status of recent college graduates will be forthcoming. This report will include data by major field on percent of graduates employed full time, unemployment rate, percent underemployed, and average annual salary. For additional information and the survey, contact the Population Surveys Branch, Division of Elementary and Secondary Education Statistics, telephone (301) 436-6729.

The computer tape containing all survey information is now available. Inquiries concerning the tape should be directed to the Statistical Information Office, National Center for Education Statistics, (Presidential Building), 400 Maryland Avenue SW., Washington, D.C. 20202, telephone (301) 436-7900.

Information about the Center's statistical program and a catalog of NCES publications may also be obtained from the Statistical Information Office, same address and phone.

Introduction

This report provides data on occupational outcomes (type of occupation, unemployed, and not in the labor force) as of February 1978, by major field of study, for persons who received bachelor's degrees during the July 1, 1976-June 30, 1977, school year. The report answers such questions as:

Are graduates from some major fields of study more likely than those from others to get a job in the area of their major field?

What types of jobs do graduates hold that are not in the area of their major field of study?

How many graduates in the different major fields of study hold jobs that do not normally require college-level training?

This information is intended for use by students, educational planners, policy makers, and program administrators at the postsecondary level. Section I presents findings which summarize the occupational outcome data by major field of study. Since certain fields and occupations tend to attract members of one sex more than the other, occupational outcome is examined separately for males and females. Also, since the occupational outcomes of bachelor's recipients who are enrolled and who are not enrolled for an advanced degree may be different, occupational outcome, too, is looked at separately for those enrolled and not enrolled for an advanced degree.

The basic data tables presented in Section II are designed to serve as reference tables for college students and others involved in the process of choosing a major field career. In summary, these tables provide "profiles" of occupation and employment status for the major fields of study covering all bachelor's recipients, men and women, and those enrolled and not enrolled for an advanced degree.

The data reported are from the Recent College Graduate Survey¹ which obtained information for bachelor's recipients who received their degrees during the period July 1, 1976 - June 30, 1977. Their occupational status was that which existed in February 1978. Both full- and part-time jobs are included in the occupational data and are not further differentiated here.

Section I -- Summary Data for Occupational Outcome by the Major Field Groups

The summary data describe the occupational outcome of graduates with majors in professional fields and arts and sciences.² Within these areas, 10 groups of major fields are examined.³ Occupational outcome is examined in the summary data, for professional, managerial and technical occupations, for nonprofessional, nonmanagerial and nontechnical occupations, for graduates in the armed forces, for those who are unemployed,⁴ and those not in the labor force.⁵ (The numbers for armed forces and unemployed are small but are included to allow the data to sum to the total.)⁶

- 1/ See appendix 1 for a description of the Recent College Graduate Survey.
- 2/ The professional fields category consists of major fields for which there are, generally, separate schools within colleges and universities, such as schools of business administration, education, nursing, social work, and engineering. Major fields that were classified under arts and sciences are primarily those that fall under the general umbrella of arts and science programs. The "other" category is comprised of major fields which did not fall clearly within professional fields or arts and sciences. Professional fields are business and management, education, engineering, health professions, public affairs and social services. Arts and science fields are biological sciences, mathematics and physical sciences, social sciences, humanities, psychology.
- 3/ See appendix 3 for the HEGIS classification of major fields used for coding purposes and appendix 4 for the major field code groupings which comprise the major field categories in the tables.
- 4/ Unemployed graduates are those who, during the survey week, had no employment within the past 4 weeks.
- 5/ Graduates not in the labor force are those who were not working and were not looking for work.
- 6/ See appendix 5 for the 1970 Bureau of the Census classification of occupations used for coding purposes and appendix 6 for the occupation code groupings which comprised the occupation categories in the tables.

The Employment Status of Bachelor's Recipients Shortly After Graduation. Overall, graduates in the professional fields of study are more likely than those in the arts and sciences to have professional-, managerial- or technical-level jobs, as seen in the following table:

Major Field

Professional Fields

Occupational Status	Total	Business and Management	Education	Engineering	Health Professions	Public Affairs/ Social Services
Total.....	100%	100%	100%	100%	100%	100%
Professional, managerial and technical.....	67	57	73	74	84	43
Nonprofessional, nonmana- gerial, and nontechnical....	21	32	16	12	5	40
Armed forces.....	2	2	1	2	1	5
Unemployed.....	4	3	4	5	4	5
Not in the labor force.....	6	6	6	7	7	6

Arts and Sciences

	Total	Biological Sciences	Mathematics and Physical Sciences	Social Sciences	Humanities	Psychology
Total.....	100%	100%	100%	100%	100%	100%
Professional, managerial, and technical.....	41	38	58	38	41	37
Nonprofessional, nonmana- gerial, and nontechnical.	30	21	17	32	34	37
Armed forces.....	1	1	5	2	0	1
Unemployed.....	7	7	1	7	9	4
Not in the labor force....	21	11	19	21	14	20

However, with regard to occupation level, considerable variation exists among graduates in the major field groups which make up the professional fields and arts and sciences. Among the professional fields, a higher

proportion of the graduates in the health professions held professional-, managerial- or technical-level jobs (84 percent) than did graduates in business and management (57 percent) and public affairs and social services (43 percent). Among the arts and sciences, the mathematics and physical sciences field stands out as having a high proportion of graduates in the higher-level jobs (58 percent, compared to between 37 and 41 percent for the other arts and sciences).

It should also be noted that all the arts and science fields have higher proportions of graduates "not in the labor force" (from 14 to 33 percent among the several major fields, with an average of 21 percent) than do graduates in the professional fields (an average of 6 percent).⁷

⁷/ Many of the graduates who were out of the labor force were continuing their education. Those continuing their education are much more frequent among graduates in the arts and sciences than in the professional fields (see the section on enrollment for an advanced degree, page 8).

Comparing the Employment Status of Men and Women Bachelor's Recipients
One interesting question is how the general relationships between major field and occupational outcome might shift when looked at separately for men and women.⁸

Major Field - Males

Professional Fields

Occupational Status	Total	Business and Management	Education	Engineering	Health Professions	Public Affairs/Social Services
Total.....	100%	100%	100%	100%	100%	100%
Professional, managerial, and technical.....	64	58	72	75	74	41

Armed forces.....	2	1	6	2	1	3
Unemployed.....	6	7	1	6	10	5
Not in the labor force.....	22	35	19	23	15	12

NOTE: See table 3 for additional detail

8/ The proportions of men and women in the several major field groups and occupation categories are presented in appendix 1A. In summary, men are much more highly represented in the major fields of business and management, engineering and mathematics and physical sciences. Women graduates were more highly represented in education and health fields of study. In terms of occupations, men graduates were highly represented in eight occupation groups--business persons and managers, engineers, social scientists and psychologists, computer specialists, sales persons, crafts persons, operatives and laborers, including farm workers. Women were represented more highly among educators and health professionals.

Major Field - Females

Professional Fields

Occupational Status	Total	Business and Management	Education	Engineering	Health Professions	Public Affairs/ Social Services
Total.....	100%	100%	100%	100%	100%	100%

Unemployed.....	7	7	2	8	9	4
Not in the labor force.....	19	29	16	17	14	25

(See table 4 for additional detail)

- Number in sample too small to report.
- * Less than 0.5 percent.
- ** Zero in sample.

Contrary to expectation, there are no striking differences in the overall pattern of the summary data for men and women graduates. In each of the broad fields of study covered in the preceding tables, women who studied in a particular major field had about the same pattern of occupational outcomes as men, regardless of whether the field is predominantly male or female. There are, however, some minor differences for individual major field

groups. For example, female health professionals are more likely than males to hold jobs at the professional, managerial and technical levels (with women health professionals employed primarily as nurses and health technicians). Female graduates in public affairs and social services are less likely not to be in the labor force. Female biological scientists are more likely than males to hold professional-, managerial- and technical-level jobs (with women employed to a greater extent than men as science or health technicians).

Comparing the Employment Status of Bachelor's Recipients Enrolled and Not Enrolled for an Advanced Degree. Another way of looking at the overall summary data is to separate it by those enrolled and not enrolled for an advanced degree. For those who, at least initially, do not wish to seek further academic training, what are the job prospects for the different major field groups? And what are the prospects for those who do seek further schooling, either full- or part-time?

Major Field - Enrolled

Professional Fields

Occupational Status	Total	Business and Management	Education	Engineering	Health Professions	Public Affairs/ Social Services
Total.....	100%	100%	100%	100%	100%	100%

Armed forces.....	*	**	**	**	1	1
Unemployed.....	5	5	1	8	6	2
Not in the labor force.....	45	59	40	43	33	42

* Less than 0.5 percent.

** Zero in sample.

NOTE: See table 5 for additional detail.

9/ The proportions of bachelor's recipients enrolled and not enrolled for an advanced degree in the several major field groups and occupational categories are presented in appendix 1B. In summary, the arts and sciences fields have higher proportions enrolled for an advanced degree than do the professional fields. The exception occurs in the humanities, the arts and science field with the highest rate. The proportion in this field was the same as the proportion enrolled for an advanced degree in public affairs and social services, the professional field with the lowest rate.

Major Field - Not Enrolled

Professional Fields

Occupational Status	Total	Business and Management	Education	Engineering	Health Professions	Public Affairs/ Social Services
Total.....	100%	100%	100%	100%	100%	100%
Professional, managerial, and technical.....	70	58	74	79	91	47
Nonprofessional, nonmana- gerial, and nontechnical..	22	33	16	14	4	40
Armed forces.....	1	2	1	1	*	2
Unemployed.....	3	3	4	4	2	7
Not in the labor force.....	3	2	5	1	2	4

Arts and Sciences

Total	Mathematics and					Psychology
	Biological Sciences	Physical Sciences	Social Sciences	Humanities		
Total.....	100%	100%	100%	100%	100%	100%
Professional, managerial, and technical.....	47	56	62	44	43	39
Nonprofessional, nonmana- gerial, and nontechnical....	36	27	24	38	38	46
Armed forces.....	2	2	8	2	*	2
Unemployed.....	7	9	1	7	10	6
Not in the labor force.....	7	6	4	8	7	8

* Less than 0.5 percent.

NOTE: See table 6 for additional detail.

The most obvious difference between those enrolled and not enrolled for an advanced degree is found for those not in the labor force. Only small proportions of those graduates not enrolled for an advanced degree (no more than 8 percent for any major field group) are not in the labor force. For those enrolled for an advanced degree, understandably, the proportions are quite large, although, even among these, the majority (except for biological sciences) are in the labor force. Also, for those not enrolled for a degree, the differences

between the proportions of graduates in the professional fields and arts and sciences who are not in the labor force are relatively small. When looking at those enrolled for a degree, however, one notes that those enrolled in the arts and sciences overall who are not in the labor force (45 percent) are higher than for the professional fields (22 percent).

Section II -- Reference Data on Occupational Outcome by Major Field

Introduction. Tables 1-5 present basic data on occupational outcome by major field for all bachelor's recipients, males and females, and enrolled and not enrolled for an advanced degree. These tables provide data on major field for the 10 major field groups. More detailed information is provided in table 6, which includes occupational outcome data for 26 relatively specific major fields.

Table 1. This table describes the occupational outcome of graduates with majors in professional fields, arts and sciences and other fields. Additional major field categories are provided representing the 10 major field groups used to present the summary data. Occupational outcome, however, is provided in considerably greater detail. The following are the occupational outcome categories in table 1:

OCCUPATION	
TOTAL.....	BIO & PHYS SCIENTISTS & MATHEMATICIANS.....
PROFESSIONAL, MANAGERIAL AND TECHNICAL.....	FINE ARTS.....
BUSINESS PERSONS AND MANAGERS.....	SOCIAL SCIENTISTS & PSYCHOLOGISTS.....
ACCOUNTANTS.....	RESEARCH WORKERS NOT SPECIFIED.....
MANAGEMENT AND ADMINISTRATION.....	COMMUNICATIONS.....
OTHER.....	COMPUTER SPECIALISTS.....
EDUCATORS.....	TECHNICIANS.....
ELEMENTARY/SECONDARY TEACHERS.....	HEALTH.....
COLLEGE TEACHERS.....	ENGINEERING AND SCIENCE.....
OTHER.....	OTHER.....
ENGINEERS.....	OTHER PROF, MANAGERIAL, & TECHNICAL.....
CIVIL.....	NONPROF, NONMANAGERIAL, NONTECHNICAL.....
ELECTRICAL.....	SALES.....
OTHER.....	CLERICAL AND RELATED WORKERS.....
HEALTH PROFESSIONALS.....	CRAFTS.....
REGISTERED NURSES.....	OPERATIVES.....
PRACTITIONERS.....	LABORERS, INCLUDING FARM.....
OTHER.....	SERVICE.....
PUB AFFAIRS & SERVICES, RELIGIOUS WORKERS..	ARMED FORCES.....
SOCIAL WORKERS.....	UNEMPLOYED.....
OTHER.....	NOT IN THE LABOR FORCE.....

In examining table 1, one can see, in the case of business and management, for example, that 47 percent of the 162,700 bachelor's recipients in this field held jobs as business persons and managers (accountants were 26 percent and managers and administrators were 19 percent). The only other kinds of jobs held in any magnitude by these majors were sales and clerical and related jobs, each 13 percent. More generally, it can be seen that 57 percent of business and management graduates held professional, managerial and technical jobs, 32 percent held nonprofessional, nonmanagerial and nontechnical jobs, and 6 percent were not in the labor force.

Looking at a second example, of the 118,000 bachelor's recipients in the social sciences, only 2 percent held a job either as a social scientist or psychologist, 13 percent were in management and administration, and 15 percent held a clerical or related job. At the more general level, 38 percent held professional-, managerial- and technical-level jobs, 32 percent held nonprofessional, nonmanagerial and nontechnical jobs, and 21 percent were not in the labor force.

Table 2-5. These tables describe the occupational outcome of males and females (tables 2 and 3) and graduates enrolled and not enrolled for an advanced degree (tables 4 and 5). Major field is presented for the 10 major field groups. Occupational outcome is presented in these tables for a somewhat reduced set of categories in order to decrease the number of small-cell entries.

Table 6. In table 6, greater major field specificity is provided -- data are presented for 26 major fields of study for purposes of examining occupational outcome in greater major field detail. The following are the 26 major fields in table 6 ordered by their more general major field groups: ¹⁰

- | | |
|--|---|
| <ul style="list-style-type: none"> - business and management <ul style="list-style-type: none"> business and commerce, general accounting business, management and administration marketing and purchasing - Education <ul style="list-style-type: none"> elementary education special education physical education - Engineering <ul style="list-style-type: none"> civil engineering electrical engineering - Health professions <ul style="list-style-type: none"> nursing - Public affairs and social services <ul style="list-style-type: none"> social work and helping services - Biological sciences <ul style="list-style-type: none"> biology, general | <ul style="list-style-type: none"> - Mathematics and physical sciences <ul style="list-style-type: none"> mathematics chemistry, general - Social sciences <ul style="list-style-type: none"> economics history political science and government sociology - Humanities <ul style="list-style-type: none"> fine and applied arts foreign languages letters - Psychology - Other <ul style="list-style-type: none"> agriculture and natural resources communications home economics architecture and environmental design law-enforcement and corrections |
|--|---|

^{10/} Data are presented only for those major fields for which there were about 10,000 or more bachelor's recipients.

As an example, table 6 shows that 71 percent of accounting majors held jobs as accountants. The next most frequent type of job held by accounting majors was clerical and related jobs (6 percent). In contrast, only 13 percent of fine arts majors held a fine arts job, 8 percent were elementary-secondary school teachers, 11 percent were in sales and 12 percent held clerical and related jobs.

Appendix 2

Description of the Survey

For the 1978 Recent College Graduate survey, a two-stage sample was used to obtain the data. For the first stage, a sample of 297 colleges and universities offering a bachelor's or master's degree was selected. The universe of schools was stratified by percent of graduates in the school with degrees in education; control of institution (public or private); whether or not the school was on a list of schools emphasizing special education; and by geographic region of the institution. A sample of 30 predominantly black institutions was included in the total of 297 institutions.

For the second-stage sample, a listing of graduates with bachelor's and master's degrees was obtained from the selected schools. The graduates were stratified by level of degree (bachelors and masters) and by special education graduates, other education graduates and other graduates. The sample of graduates was selected through the use of systematic sampling; that is, by selecting every n-th case with a random start.

For the 1978 survey, 283 of the 297 schools responded (95 percent) and 9,592 graduates of 11,025 in the sample responded (87 percent). A special followup of non-respondents was conducted to obtain the 87 percent response rate.

A ratio-estimation procedure was used in both surveys to inflate the sample results to estimates applicable to the total number of graduates in 1976-77. The Higher Education General Information Survey (conducted by the National Center for Education Statistics) provided the applicable estimate for total number of graduates in the various strata for the non-predominantly black schools. The Office of Civil Rights provided the applicable estimates for the predominantly black institutions.

Reliability of the estimates. Since the estimates in this report are based on a sample, they differ from the figures that would have been obtained if a complete census had been taken using the same questionnaires. There are two types of errors possible in an estimate based on a sample survey--sampling and nonsampling. Sampling errors were not available at the time of publication of this report. For information on sampling errors contact the Population Surveys Branch, National Center for Education Statistics (205 Presidential Bldg.), 400 Maryland Ave. SW., Washington, D.C. 20202. The extent of nonsampling error - systematic error or bias in the data - is unknown. As a result of the possible sources of error, particular care should be exercised when interpreting figures based on a relatively small number of cases or on small differences between estimates.

205	Buyers, wholesale and retail trade		
210	Credit men		
211	Funeral directors		
212	Health administrators		
213	Construction inspectors, public administration		
215	Inspectors, except construction, public administration		
216	Managers and superintendents, building		
220	Office managers, n.e.c.		
221	Officers, pilots, and pursers; ship		
222	Officials and administrators; public administration, n.e.c.		

¹Category "280 Salesmen and sales clerks, n.e.c." was subdivided in the Census into 5 occupation groups dependent on industry. The industry codes are shown in parentheses.

Occupation Code CLERICAL AND KINDRED WORKERS—Continued

Office machine operators—Continued

341	Bookkeeping and billing machine operators
342	Calculating machine operators
343	Computer and peripheral equipment operators
344	Duplicating machine operators
345	Key punch operators
350	Tabulating machine operators
355	Office machine operators, n.e.c.
360	Payroll and timekeeping clerks
361	Postal clerks
362	Proofreaders
363	Real estate appraisers
364	Receptionists
	Secretaries
370	Secretaries, legal
371	Secretaries, medical
372 (Q)	Secretaries, n.e.c.
374	Shipping and receiving clerks
375	Statistical clerks
376	Stenographers
381	Stock clerks and storekeepers
382	Teacher aides, exc. school monitors
383	Telegraph messengers
384	Telegraph operators
385	Telephone operators
390	Ticket, station, and express agents
391	Typists
392	Weighers
394	Miscellaneous clerical workers
395	Not specified clerical workers

CRAFTSMEN AND KINDRED WORKERS

401	Automobile accessories installers
402	Bakers
403	Blacksmiths
404	Boilermakers
405	Bookbinders
410	Brickmasons and stonemasons
411	Brickmasons and stonemasons, apprentices
412	Bulldozer operators
413	Cabinetmakers
415 (R)	Carpenters
416	Carpenter apprentices
420	Carpet installers
421	Cement and concrete finishers
422	Compositors and typesetters
423	Printing trades apprentices, exc. pressmen
424	Cranemen, derrickmen, and hoistmen
425	Decorators and window dressers
426	Dental laboratory technicians
430	Electricians
431	Electrician apprentices
433	Electric power linemen and cablemen
434	Electrotypers and stereotypers
435	Engravers, exc. photoengravers
436	Excavating, grading, and road machine operators; exc. bulldozer

Occupation Code CRAFTSMEN AND KINDRED WORKERS—Continued

440	Floor layers, exc. tile setters
441	Foremen, n.e.c.
442	Forgemen and hammermen
443	Furniture and wood finishers
444	Furriers
445	Glaziers
446	Heat treaters, annealers, and temperers
450	Inspectors, scalers, and graders; log and lumber
452	Inspectors, n.e.c.
453	Jewelers and watchmakers
454	Job and die setters, metal
455	Locomotive engineers
456	Locomotive firemen
461	Machinists
462	Machinist apprentices
	Mechanics and repairmen
470	Air conditioning, heating, and refrigeration
471	Aircraft
472	Automobile body repairmen
473 (S)	Automobile mechanics
474	Automobile mechanic apprentices
475	Data processing machine repairmen
480	Farm implement
481	Heavy equipment mechanics, incl. diesel
482	Household appliance and accessory installers and mechanics
483	Loom fixers
484	Office machine
485	Radio and television
486	Railroad and car shop
491	Mechanic, exc. auto, apprentices
492	Miscellaneous mechanics and repairmen
495	Not specified mechanics and repairmen
501	Millers; grain, flour, and feed
502	Millwrights
503	Molders, metal
504	Molder apprentices
505	Motion picture projectionists
506	Opticians, and lens grinders and polishers
510	Painters, construction and maintenance
511	Painter apprentices
512	Paperhangers
514	Pattern and model makers, exc. paper
515	Photoengravers and lithographers
516	Piano and organ tuners and repairmen
520	Plasterers
521	Plasterer apprentices
522	Plumbers and pipe fitters
523	Plumber and pipe fitter apprentices
525	Power station operators
530	Pressmen and plate printers, printing
531	Pressman apprentices
533	Rollers and finishers, metal
534	Roofers and slaters
535	Sheetmetal workers and tinsmiths
536	Sheetmetal apprentices
540	Shipfitters
542	Shoe repairmen

Occupation Code	CRAFTSMEN AND KINDRED WORKERS— Continued
543	Sign painters and letterers
545	Stationary engineers
546	Stone cutters and stone carvers
550	Structural metal craftsmen
551	Tailors
552	Telephone installers and repairmen
554	Telephone linemen and splicers
560	Tile setters
561	Tool and die makers
562	Tool and die maker apprentices
563	Upholsterers
571	Specified craft apprentices, n.e.c.
572	Not specified apprentices
575	Craftsmen and kindred workers, n.e.c.
580	Former members of the Armed Forces

OPERATIVES, EXCEPT TRANSPORT

601	Asbestos and insulation workers
602 (T)	Assemblers
603	Blasters and powdermen
604	Bottling and canning operatives
606	Chainmen, rodmen, and axmen; surveying
610	Checkers, examiners, and inspectors; manufacturing
611	Clothing ironers and pressers
612	Cutting operatives, n.e.c.
613	Dressmakers and seamstresses, except factory
614	Drillers, earth
615	Dry wall installers and lathers
620	Dyers
621	Filers, polishers, sanders, and buffers
622	Furnacemen, smeltermen, and pourers
623	Garage workers and gas station attendants
624	Graders and sorters, manufacturing
625	Produce graders and packers, except factory and farm
626	Heaters, metal
630	Laundry and dry cleaning operatives, n.e.c.
631	Meat cutters and butchers, exc. manufacturing
633	Meat cutters and butchers, manufacturing
634	Meat wrappers, retail trade
635	Metal platers
636	Milliners
640	Mine operatives, n.e.c.
641	Mixing operatives
642	Oilers and greasers, exc. auto
643	Packers and wrappers, except meat and produce
644	Painters, manufactured articles
645	Photographic process workers
	Precision machine operatives
650	Drill press operatives
651	Grinding machine operatives
652	Lathe and milling machine operatives
653	Precision machine operatives, n.e.c.
656	Punch and stamping press operatives
660	Riveters and fasteners

OPERATIVES, EXCEPT TRANSPORT Continued

661	Sailors and deckhands
662	Sawyers
663	Sewers and stitchers
664	Shoemaking machine operatives
665	Solderers
666	Stationary firemen
	Textile operatives
670	Carding, lapping, and combing operatives
671	Knitters, loopers, and toppers
672	Spinners, twistors, and winders
673	Weavers
674	Textile operatives, n.e.c.
680	Welders and flame-cutters
681	Winding operatives, n.e.c.
690	Machine operatives, miscellaneous specified
692	Machine operatives, not specified
694	Miscellaneous operatives
695	Not specified operatives

Occupation
Code

TRANSPORT EQUIPMENT OPERATIVES

701	Boatmen and canalmen
703	Bus drivers
704	Conductors and motormen, urban rail transit
705	Deliverymen and routemen
706	Fork lift and tow motor operatives
710	Motormen; mine, factory, logging camp, etc.
711	Parking attendants
712	Railroad brakemen
713	Railroad switchmen
714	Taxicab drivers and chauffeurs
715 (U)	Truck drivers

LABORERS, EXCEPT FARM

740	Animal caretakers, exc. farm
750	Carpenters' helpers
751 (V)	Construction laborers, exc. carpenters' helpers
752	Fishermen and oystermen
753	Freight and material handlers
754	Garbage collectors
755	Gardeners and groundskeepers, exc. farm
760	Longshoremen and stevedores
761	Lumbermen, raftsmen, and woodchoppers
762	Stock handlers
763	Teamsters
764	Vehicle washers and equipment cleaners
770	Warehousemen, n.e.c.
780	Miscellaneous laborers
785	Not specified laborers

FARMERS AND FARM MANAGERS

801 (W)	Farmers (owners and tenants)
802	Farm managers

SERVICE WORKERS, EXC. PRIVATE HOUSEHOLD—Continued

32²⁷
